

Inter-Steel stock a comprehensive range of Chrome Moly white iron Wear Buttons.

Wear Buttons provide superior abrasion and impact protection in a range of Fixed & Mobile plant applications.

The use of Wear Buttons can provide superior protection from extreme wear in localised areas.

Time consuming and costly hard facing methods can be replaced with the more economical use of these Wear Buttons.

The white iron material is bonded to a mild steel backing plate providing excellent weldability and stability in the toughest of environments.

Typical Applications:

- Earthmoving Buckets
- Excavators
- Chutes
- GET Protection

Hardness:

Typical 700 HB (63 Rc)

SIZES STOCKED INCLUDE:

Part No	Description	Size	Weight (Kg)
WB60	Wear Button	60 O/D	0.7
WB75	Wear Button	75 O/D	1.0
WB90	Wear Button	90 O/D	1.5
WB115	Wear Button	115 O/D	2.6
WB150	Wear Button	150 O/D	5.7
